Eliminate holes in walls forever! Display, change, add, remove or re-position artwork instantly and effortlessly! The J Rail system is a classic channel hanging system designed for simplicity and versatility.

J Rail : System Overview

J Rail track is pre-drilled for #6 screws spaced at 30 cm. (approximately 12"). Track sections can be joined end to end for continuous runs of any length. J Rail accepts both cables and rods which can slide in the track for horizontal adjustment. Hangers slide on the cables/rods for vertical adjustment & lock into position when finger pressure is released. For maximum stability 2 hanging cables/rods per frame are recommended. J Rail track is intended for wall mounting applications and is suitable for frame walls (with screws driven into a backing structure such as a 2x4) or masonry (with supplied anchors).

J Rail Track Specifications and Details

- **Tracks sections are extruded aluminum, 200 cm (approx. 78.75") long.**
- **White track is powder coated. Grey is clear anodized.**
- **Track rated load capacity is 14 lb./linear foot (90 Lb./section).**
- **Cables are 2mm. in diameter. Clear Perlon (nylon) or braided steel.**
 - **Cable ratings >Clear Perlon 33 lb./cable. Braided steel 45 lb./cable.**
